

Date:

Wednesday Challenge Form

Group Members: Raul, Christian, Shaunt

Problem Statement:

make a sketch up of the letter “E” and give it to someone else to have then make it out of cardboard.

• Approach:

Keeping in mind that we have to only turn in one of the E’s, we took our time to make our sketch up as detailed As possible. What we did was we wrote the measurements down on the “E” to make as easy as possible for the other group to put it together.

Solution: Our sketch up that we received was done incorrectly.. the measurements were in feet so we couldn’t build it because it was so big.

Lessons Learned: We won but it was because we made sure the measurements and everything were correct
